Luxaflex®

BLINDQUIP

GENERAL INFORMATION

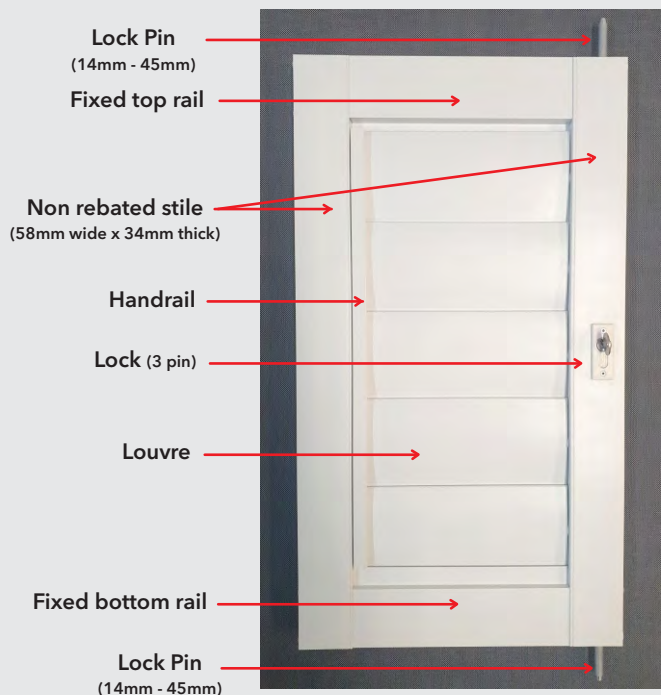

- All metal components are rust resistant.
- Shutters models are available in both even and odd panel numbers.
- Uniform keys are available as an option, allowing a single key for multiple shutters.
- Key locks on both sides of the shutter panel are available as an option, allowing the shutter to be locked from both sides of the opening.
- Louvre connectors/hand rails are fitted to the left front side of each panel by default.
- Louvres rotate and close in both directions which offers superior privacy and light control.
- Suited for internal and external applications.
- Up to a 7 year product warranty.

SHUTTERX

GENERAL INFORMATION

Terminology

TECHNICAL INFORMATION

The Technical Stuff!

- Solutions available
 - *Hinged applications*
 - Recess with 3 or 4 sided frame
 - Face Fix with 3 or 4 sided frame
 - *Bifold applications*
 - Recess with standard top and bottom tracks (cleats are available for non-square openings)
 - Face Fix with 3 or 4 sided frame
- Panel widths available:
 - Minimum of 300mm
 - Maximum of 900mm
- Suited for internal and external applications
- Up to 7 year product warranty
- Suitable for areas where security, privacy, light and temperature control are required

Safety and Security!

- Aluminium Security Shutter
- Each shutter is locked with a 3 pin security lock cylinder and mechanism
- 14-45mm locking pin on both top and bottom of shutter panel which may extend into the wall and floor
- 100mm wide reinforced louvre complete with extra strong louvre attachment system
- Superior tamper proof fixings (louvre to stile, stile to frame, frame to opening)

AESTHETIC INFORMATION

The Look!

- Fixed top and bottom rails with variable louvre pitch
- Wide panels up to 900mm available allowing for most uninterrupted view
- All shutters are fitted with 100mm elliptical shaped l louvres and are rotated by means of an offset front louver connector/hand rail. This provides maximum unrestricted view
- Adjustable cleats are available as an option for recess bifold models which allow for installation in non-square openings.
- Available in matt white (alternative colours are available on request)

Security

- **How many pins are there in your shutter's lock?**
 - *ShutterX has 3 pins.*
- **How deep does the top/bottom pin protrude?**
 - *ShutterX can protrude up to 45mm top and bottom providing even strength.*
- **How is the louvre secured to the panel?**
 - *ShutterX has a complex attachment mechanism to secure the louvre to the stile. The more force applied to try remove the louvre, the tighter the tamperproof stile cover grips the stile and holds the louvre securely in place.*

SHUTTERX

Aesthetics

- **Width of the ShutterX louvre?**
 - ShutterX has a large width of 100mm which allows more light and creates a less obstructive view.
- **Pitch of ShutterX louvres?**
 - ShutterX has a fixed top and bottom rail, which allows for more louvres and less frame.
- **ShutterX offers wider panels**
 - ShutterX up to width of 900mm per panel.

Pricing

- Importantly ShutterX doubles as a security gate as well as window covering (replacing a blind/curtain).
- ShutterX is priced extremely competitively and alternative security shutter quotes are encouraged.
